TO WHOM IT MAY CONCERN

Heli-Union is using autonomous lighting system manufactured and delivered by Solutions4GA LLC ("S4GA"). System is utilized on our helipad located on remote areas in order to maintain 24/7 transport operations to and from off-shore oil drilling platforms.

Our pilots are satisfied with the visibility range provided by the lighting system. S4GA helipad lighting is easy to install, operate and requires almost no maintenance.

We would highly recommend this product to other S4GA customers.

Sincerely,

JONATHAN COSSON
HELI-UNION
